DAY CARE

Day care provides structured daily support for children with disabilities in a safe and inclusive environment.
Children receive individual support, participate in developmental and social activities, and build communication, interaction, and basic self-care skills.

SOCIAL ADAPTATION

Social adaptation services are aimed at integrating children with disabilities into everyday social life.
The service supports the development of communication skills, independence, self-confidence, and interaction with others.

COUNSELING

Counseling provides individual support for children with disabilities and their parents. It helps families better understand the child's needs, find effective daily solutions, and maintain a stable emotional environment at home.
